Spies From Cuba

It is estimated that 300 Cubans have left Florida for Havana since the unsuccessful anti-Castro invasion. They are Communists whose work of spying on the anti-Castroites has been completed.

At the same time, about 400 anti-Castro refugees have arrived lately from Cuba.

Apparently the Communists think there will be no more invasions. Certainly there will be none carried out by the Central Intelligence Agency. If America sanctions any more invasions of Cuba, it should be done with full-scale military planning and for a clear reason — communism has established a beachhead in Americas in violation of the Caracas resolution of the Organization of American States.
